Education

University of North Carolina at Chapel Hill May 2021

- Bachelor of Arts in Computer Science
- Current GPA: 3.55/4.00; Dean's List Spring 2018, Spring 2019
- Relevant Coursework: Data Structures, Discrete Structures, Data Compression, Computer Organization, Modern Web Programming, Models of Languages and Computation, Algorithms and Analysis
- Courses in Progress: Computer Security Concepts, Operating Systems, Files and Databases

Skills

- **Programming Languages:** Java, Python, JavaScript, React.js, C, HTML/CSS, SQL, C#, GitHub/Git
- **Operating Systems:** Windows, macOS, Ubuntu

Experience

Software Engineering Intern, *Capital One,* McLean, VA (Remote due to COVID-19) June 2020 - August 2020

- Worked with a team of engineers in a fast-paced agile environment to develop a full-stack web application that allows developers to request access to Google Suite APIs and an admin dashboard to review these requests
- Studied for and passed Certified Secure Software Engineer (CSSE) examination

Undergraduate Teaching Assistant, *University of North Carolina at Chapel Hill,* Chapel Hill, NC August 2019 - Present

- Worked with small team to assist in development of pilot for Systems Fundamentals course, and was recently promoted to take on more leadership roles within the team of Teaching Assistants for Professor Kris Jordan
- Held weekly office hours, which were open to ~200 students, to facilitate discussion about course material, solve problems, and guide students on labs and homework assignments
- Designed review material for Systems Fundamentals course, covering C programming, shell scripting, and software development tools such as Vim, Git and Makefiles

Backend Developer, *UNC Computer Science + Social Good,* Chapel Hill, NC August 2019 - Present

- Worked with team to design and create an admin portal for MyHealthEd, Inc. and its Real Talk Mobile App, a social media platform to support adolescent mental health
- Designed and implemented database schema and API routes using PostgreSQL/Sequelize.js and Express.js and integrated this backend with the team's React application
- Currently developing an inventory management system for Carolina Closet, a nonprofit organization that provides disadvantaged students and faculty with access to business attire, to ensure that professional attire is not a barrier to desired opportunities

Consumer Experience Technology Intern, *Ally Financial,* Charlotte, NC May 2019 - August 2019

- Worked with HTML/Bootstrap, Python/Flask, and ServiceNow APIs to create a tool that automated hardware/software orders and ServiceNow requests for new hires
- Presented this project to company executives and worked with team on a plan to deploy this project

Activities

- Computer Science + Social Good August 2019 - Present
- UNC Computer Science Club January 2018 - Present
- Carolina Data Science and Analytics Club August 2018 - Present

Projects

Run-MUN February 2018 - August 2018

- Developed a Python desktop app to organize debate structures and timings for Model UN conferences
- App helped staffers to keep statistics about attendance, debate timing, and delegate performance at UNC-Chapel Hill's two competitive conferences

Syntactic Sugar August 2018 - December 2018

- Developed a full-stack web application with a partner as a final project for UNC's Modern Web Programming course using jQuery, Express.js and Node.js
- App consumed the spoonacular API to allow users to find recipes and upload their own to share with other users
